SUMMARY

I am a recent PhD graduate from Brunel University of London specializing in applied macroeconometrics and the distributional effects of macroeconomic shocks. My current research centers on the transmission of macroeconomic shocks. With relevant exposure to central banking, I continue to manage my own research publications, presenting at academic seminars and conferences whilst contributing and engaging with policymakers through internal communications. Currently, I am a senior research economist at the **Central Bank of Malta (CBM)**.

EDUCATION AND EXPERIENCE

present	Senior Research Economist at CBM, Economic Research Department
2024 - 2025	PhD Intern at CBM, Economic Research Department
